

# Fun Flush Rental Instructions

## Equipment Needed:

- 5 Red metal support brackets,
- 1 with Netting = 6
- 1 White "Fun Flush" tank
- 1 Red & White Target Arm
- 1 PVC Pipe with Elbow
- 3 Tennis Balls
- 2 Bungee Cords

## Set Up Instructions:

1. Locate a level place to set up this game. Grass or asphalt are both OK. Place red support brackets (looks like an upside down "T") on ground approximately six feet apart.
2. Place the two red side supports into the square holes in each bracket now on the ground.
3. Place top support bracket (with black netting attached) into top holes of side supports. Make
4. sure poles are completely in the square holes of each bracket!
5. Now locate white, rectangle "Fun Flush" unit.
6. Locate slot in bottom of white tank unit. Place "Fun Flush" unit in front center of netting.
7. Using **two** people, (one on each side of netting) **carefully** lift unit to top, center of top support bracket.

Place slot in tank bottom so it straddles the top support bar. Make sure unit is level and completely in the slot. Now make sure unit is facing area where players will throw from.

8. Attach hose to left side of unit and screw in tightly.
9. Place white PVC pipe into hole in rear of unit with elbow facing down. This is where water will exit. Turn hose on--tank will fill to a level and stop any additional water from entering tank. You don't need to turn hose on and off.
10. Stand or sit "flushee" directly under hole in PVC pipe.
11. Leave hose running entire time you are using fun flush unit.

**Important Note:** **NEVER** use anything but tennis balls! You will be charged for ripping net if using hard balls or softballs to play this game.

## Playing the Game

1. Player gets three throws at target from ten-twelve feet away. Hitting target will flush water on person behind net.
2. A prize is not necessary to give to winners--the action of the game is usually sufficient.

## Returning the Fun Flush

All parts listed below must be returned in good working condition. Any parts missing or broken will be charged at the price listed.

<b>U</b>	<b>Qty</b>	<b>Item</b>	<b>Price</b>
